NEW BEDFORD HARBOR SUPERFUND SITE ANNUAL FUNDING AND EXPENSES FOR YEARS 2009-2010 10/27/10

Notes Explaining Funding/Expenses Work Sheet

Work Sheet Row Explanation

- Typical average duration for a dredge season is 42.5 days with \$15 million in annual funding.
- In addition to the annual funding listed, additional funding was received in 2010 for use in 2011. This includes \$4.3 million in state cost-sharing funds and \$4.5 million from EPA HQ. In addition, \$1.57 million of unobligated 2008 site funds were also rolled over into 2009. Funding is by Calendar Year January 1, 2009 through December 31, 2009 and January 1, 2010 through September 30, 2010.
- 2010's \$15 million annual funding consists of \$10 million stimulus funding and \$5 million HQ funding. Stimulus funding came in place of HQ funding from other sites across the country which no longer needed stimulus funding.
- Expenses are by Calendar Year January 1, 2009 through December 31, 2009 and January 1, 2010 through September 30, 2010.
- Includes costs for project management, construction supervision, contract administration, safety and technical support.
- U.S. Army Corps of Engineers (USACE) Headquarters Management & Support (M&S) fee (2008 2%, 2009 1.4% of total expenses).
- 14 Includes lease payments, quality assurance lab, etc.
- 21&25 Costs are by Calendar year (dredge scason) included projected expenditures through 2010.
- As noted on the spreadsheet, the 2009 funding includes \$1,568,237.24 in rollover funds from 2008 (\$45.29m + \$1.57m \$31.78m = \$15.08m).
- Jacobs Engineering costs include dredging, operating treatment plants, monitoring and analytical services, transportation and disposal (T&D), security, utilities and lagging costs.
- 19&26 Does not include first half of 2009 O&M since that was awarded with 2008 money.

- 19&41 Jacobs Engineering numbers are based on Cost to Date January 1, 2009 through December 31, 2009 and January 1, 2010 through September 30, 2010.
- The breakout for the \$9,204,288.02 for 2010 rollover funds is detailed at the bottom of the spreadsheet.
- Jacob Engineering Direct Costs, Materials & O&M Supplies include but are not limited to: supplies for mobilization, health & safety, sampling, office administration, equipment purchase, maintenance and repairs; rentals of office machinery, trailers, Connex boxes, backhoe, site vehicles; communication systems and repairs; boat repairs; site drinking water; site vehicle fuel; alarm and gate repairs and maintenance; office cleaning and sanitary supplies; leases and registrations; trash removal and recycling; building materials and small tools.
- Other Subcontractors for dredge season monitoring (air monitoring, laboratory analyses, surveying control/bathymetry) include Tantara, CR Environmental, Cashins, Katahdin, TestAmerica, Geotest, Alpha Laboratory.
- Other Subcontractors (other than dredge season monitoring) include but are not limited to: DeTerra Landscaping (snow removal); Rogers Electric; New Bedford Scale; Worcester Scale; Cashins & Associates; DJ Gile, Inc., Katahdin and Test America (non dredge season monitoring); Piping Systems; Tantara, Inc.; Datel Communications; Meridian; CR Environmental (non dredge season) and Woodgeek, Inc.
- Lagging Costs and Labor Rate Adjustments: Still waiting on final invoices from a number of subcontractors, including Sevenson incentive fee (need to negotiate), H&S addition rate per ton for T&D, additional charges for demobilization of additional railcars, and miscellaneous final invoices from other subcontractors.
- 39&40 Final amounts will be negotiated with JE and the remaining money will be applied to future contracts.
